

PRD10730 INDIVIDUAL VIDEO SYSTEM 10" BASIC WITH SD CARD 64GB DATASHEET

DESCRIPTION

TACTIL 10" BASIC is an entertainment and personal information device designed to operate on buses and other vehicles. The display adopts the IPS Technology (In Plain Switching) which prevents leakage and loss of light resulting more intense colors and greater sharpness preventing visual fatigue during extended use. The display has one backlight with high brightness white LED. Hardware and software are customized to be an entertainment center. It is developed in a system based on Android, making the initial settings easier. It has installed a main application called Launcher that is an interface to the user that allows to execute different types of applications such as playing audios and videos. The 10 points capacitive multi touch system allows greater interactivity with the equipment.
